

1. DECLARE INTENT

One approved model

Approved contract M
architecture.yaml

Validate contract
schema + semantic checks

Expected architecture
 $G_E + \text{rules } R + \text{model evidence}$

M, R

2. OBSERVE CHANGE

Base snapshot and affected head components

BASE SNAPSHOT
Git base S_b
committed tree

PROPOSED CHANGE
Git diff $S_b \rightarrow S_h$
paths + hunks

Full AST scan
cached observed graph
 $G_b = A(S_b; M)$

Incremental AST scan
supplied model M ;
affected components
 G_h with source
evidence

G_b

G_h, P

3. COMPARE AND GATE

Only introduced findings control the PR

Evaluate base and head
 $F(M, G_b)$ versus $F(M, G_h)$

Introduced finding set
 $\mathcal{F}^+ = \{f \in \mathcal{F}_h : k(f) \notin K_b\}$
Linked source/model evidence

PASS
no new
finding

BLOCK
